

Six way smart charger manual

Our company developed the six way smart charger has a fine plastic housing and rainbow base board. Portable and firm. Easy to replace slot. You can also hang on the wall. Chargers using semiconductor chip by STMicroelectronics, Europe.. Circuit design according to the charging characteristics of the battery. Advanced and reliable accurate charging. For battery it has a good repair as well as the protective effect and full charging automatic control function

When this product work for long time no charged battery and excessive consumption battery which battery voltage lower than 6.5v, charger will automatically measurement first then yellow flashing charging by small current. When charged to more than 6.5V current starts to increase to about 600 mAh (one charger tray) . The light will turn red under rapid charging to 90% about 7.9V then green light flashing current will turn small supplement to 100% . Charging complete

Yellow light:	Low battery voltage, small current charge
Red flashing:	No original battery or damage
Red light:	Normal battery charging
Green flashing:	The battery is charged to 90%
Green light:	Battery is full
Six way charger volume:	29*19*9CM
Six way charger weight:	1.5KG
AC adapter volume:	11.8*5.3*3CM
AC adapter weight:	0.25KG
Input voltage:	110V-240V
Output voltage:	12V
Output current:	5A
Packaging:	41*20.5*10.6CM
Gross weight:	2.05KG
